Because your safety is our priority.

Our Projects

Trusted by homes, businesses and institutions.

Residential Projects

Commercial Projects

Healthcare Projects

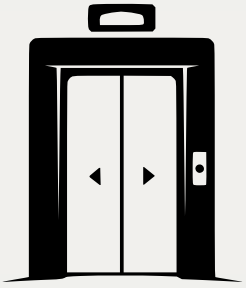

Hotels & Hospitality

> **From homes to high-rises,
> we move your world.**

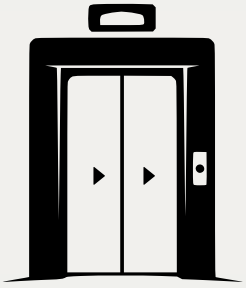

Elevator Door Types

Select the door configuration according to available shaft width, traffic flow, application and architectural intent.

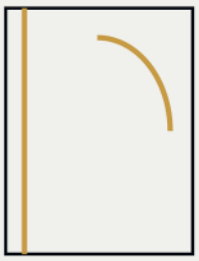

Centre Opening Automatic

Two panels open from the centre. Premium appearance and efficient passenger flow.

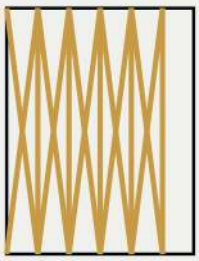

Telescopic / Side Opening

Panels slide to one side. Useful where shaft width or opening geometry is constrained.

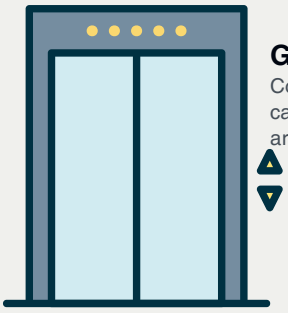

Manual Swing Door

Simple hinged landing door, typically suited to selected low-rise or home-lift applications.

Collapsible Gate

Traditional folding gate solution for selected goods/service and legacy applications.

Glass Automatic Door

Contemporary transparent finish for capsule, panoramic and premium architectural lifts.

PLANNING NOTE

Automatic telescopic (T2) and centre-opening (C2/C4) arrangements are common modern options. Final door width and configuration must be selected with the approved lift layout.

Cabin Materials & Finishes

Create the right visual language for residential, commercial, hospitality and premium projects.

SS Hairline
Brushed stainless steel

Durable • clean • timeless

Mirror SS
Mirror-polished stainless steel

Premium • reflective • modern

SS Rose Gold
Patterned stainless steel

Royal Finish

Powder Coated Steel
Durable colour-coated finish

Versatile • economical • neat

Moon Rock
scratchless panel

Architectural • distinctive

Decorative Panels
Laminate / wood-look combinations

Warm • custom • interior-led

Detail Options

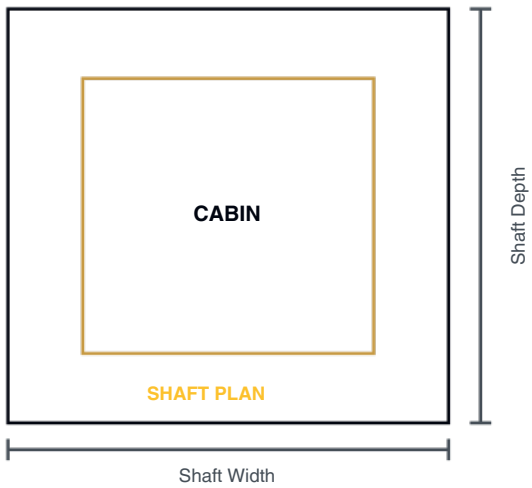

- Ceiling:LED / spot / decorative
- Handrail: SS / designer profiles
- Mirror: half / full-height / feature wall
- Flooring: granite / vinyl / stone-look
- COP: full-height / compact / touch options
- Lighting: warm / neutral / accent

Lift, Cabin & Shaft Dimensions

Indicative planning matrix by passenger capacity. Final civil dimensions must beconfirmed against the selected drive, door type, speed, entrances and approved project drawing.

Capacity	Load	Cabin W×D	Shaft W×D	Door	Pit	Headroom
4 Person	272 kg	900×1000	1500×1500	700	1200	4500
5 Person	340 kg	1000×1100	1600×1600	700	1200	4500
6 Person	408 kg	1100×1100	1700×1600	800	1200	4500
8 Person	544 kg	1100×1400	1700×1900	800	1300	4500
10 Person	680 kg	1300×1400	1900×1900	900	1400	4500
13 Person	884 kg	1600×1400	2200×1900	900	1500	4500

All dimensions in mm. Values above are brochure-level planning references, not construction drawings.

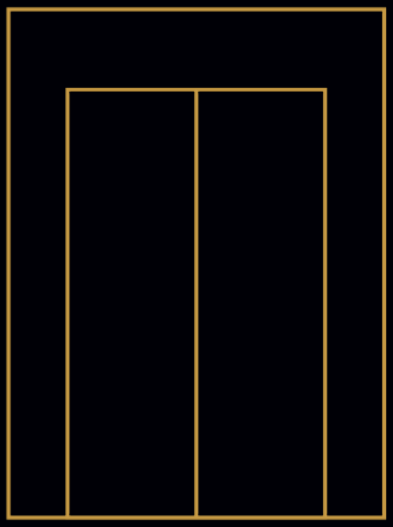

IMPORTANT

- Capacity is commonly expressed in kg and passenger count.
- Door type can materially change the required shaft width.
- Pit and headroom vary with speed, system and local project conditions.
- MRL and machine-room layouts have different planning requirements.
- Always issue a final GA / approved layout before civil execution.
